Visi-Barrier®

PRECAST POLYMER CONCRETE BARRIER PANEL

All-Weather Retro-Reflective Safety Barrier

Visi-Barrier® is a highly visible traffic barrier with FHWA approval and decades of proven successful projects. Visi-Barrier® is designed for new installations, acting as a stay-in-place form or on retrofit projects with simple bolt through connections.

Visi-Barrier® is a year-round, all weather, high visibility panel for driver safety. It is a lightweight, sustainable solution for new and aging bridge parapets.

Visi-Barrier® is simple to install. Transpo provides specific hardware to aide in seamless installations.

Lightweight, sustainable solution for aging bridge parapets and tunnel bench walls.

SAFER TRANSPORTATION THROUGH INNOVATION

Visi-Barrier®

PRECAST POLYMER CONCRETE BARRIER PANEL

Features and Advantages

- Acts as a permanent, stay-in-place barrier form.
- Retro-reflective Visi-Stripe® gives high visibility in all weather conditions.
- Available in various standard safety shapes.
- Can be custom fabricated to meet project requirements.
- State-of-the-art precast polymer concrete.
- Gel coat resists salts, chlorides and corrosion.

Continuous vertical Visi-Stripe® is available on each panel, made with highly retro-reflective glass beads. The result is a solution to poor roadway delineation problems, especially on rainy nights when visibility is low and standard roadway markings can lose retro-reflectivity when covered with water.

Each installation meets the highest safety standard and provides the best solution for protecting bridge parapets and rails.

Applications

Visi-Barrier® is available in standard and custom sizes and colors to suit a variety of applications including:

Median Barriers:

Forms a full or half Jersey type or F-shape stay-in-place permanent barrier.

Tunnel Panels:

Available in modified shapes for use on bench walls.

Bridge Parapets and Rails:

Designed to fit bridge site characteristics. Length, height, and shape of the barrier are varied depending on the project design.
