Color-Safe®

AIRFIELD PAVEMENT MARKING

Durable High Definition

Color-Safe® is a Methyl Methacrylate (MMA) based product and is the only UV stable material for airfield marking.

Easily applied by hand with squeegees and rollers or with automatic spray equipment, Color-Safe® cures without requiring external heat sources.

Color Safe® is capable of full cure in a wide range of temperatures, and cures fast - ready for aircraft and vehicle traffic in 30 to 60 minutes at 70 degrees F.

Color-Safe® enhances your airfield markings program with high visibility color and increased service life.

Color-Safe® is compliant with AC Circular: Standards for specifying construction at airports, Item P-620 Runway and Taxiway Markings.

Color-Safe® Airfield Markings are:

AFFORDABLE

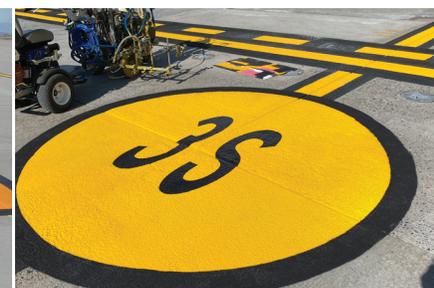

- Material costs per sq. ft are substantially lower than preformed thermoplastic markings

DURABLE

- Much more durable than waterborne paint markings with an average life-cycle of 5 years with little or no maintenance
- Solidly adheres to concrete and asphalt surfaces

EXCELLENT COLOR RETENTION

- UV resistant methyl methacrylate resin holds the surface color for the life of the product
- A variety of FAA compliant colors are available
